SUMMARY

Aspiring Front-End Engineer with experience building responsive and scalable web applications using React, JavaScript, HTML5, and CSS3. Skilled in developing reusable UI components, integrating APIs, and optimizing frontend performance to deliver user-focused experiences. Strong foundation in debugging, cross-browser compatibility, responsive design, and modern frontend development workflows using Git and component-based architecture.

EDUCATION

Full-Stack Web Development Bootcamp

Aug 2024 - Apr 2025

Simplilearn

- Completed hands-on training in frontend and backend technologies such as HTML, CSS, JavaScript, Angular, and Java
- Built full-stack applications following modern software development practices

California State University, Northridge

Aug 2022- May 2024

B.A in Animation

Relevant course: Web design, Web Development

GPA: 3.40, Dean's List

TECHNICAL SKILLS

- **Languages & Frontend Technologies:** JavaScript (ES6+), HTML5, CSS3, React, REST APIs
 - **Tools:** Git, GitHub, VS Code, Chrome DevTools
 - **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DOM Manipulation, Responsive Web Design, Cross-Browser Compatibility, Debugging & Troubleshooting, Accessibility (WCAG Fundamentals)
-

PROJECTS

Task Manager Application | React, Nodejs/Express, TailwindCSS, MySQL

Apr 2026

- Developed a weather application integrating third-party APIs to deliver real-time weather data with asynchronous JavaScript handling.
- Reduced redundant API requests by ~20% through optimized rendering and request management, improving application efficiency.
- Designed responsive UI layouts adaptable across multiple devices, improving accessibility and mobile usability.

Weather App | JavaScript, HTML, REST API, CSS

March 2025

- Developed a task management application supporting 100+ active tasks with real-time UI updates, improving responsiveness and user interaction speed.
- Refactored frontend architecture into reusable React components, reducing duplicated code by 30% and improving maintainability for future feature expansion.
- Identified and resolved state management and rendering issues, reducing UI inconsistencies and improving application stability across multiple browsers.

Movie App | React, AppWrite, TailwindCSS

June 2025

- Built a movie search application with asynchronous API integration capable of rendering dynamic search results in under 1 second.
- Implemented responsive grid layouts and structured UI components, improving mobile accessibility and overall user experience.
- Debugged asynchronous data flow and rendering issues, reducing runtime errors and improving application reliability.

RELEVANT EXPERIENCE

Invoice Template Developer | Freelance/Remote

Sep 2025 - Oct 2025

- Designed and implemented a client-facing invoice template used in 1,000+ customer transactions, supporting daily business operations and customer communications.
- Applied structured HTML/CSS styling and layout improvements to enhance readability, branding consistency, and invoice organization.
- Collaborated directly with stakeholder feedback to refine typography and information hierarchy, reducing formatting inconsistencies and improving billing clarity.

ADDITIONAL EXPERIENCE

Frontend Development (Project-Based)

- Built responsive HTML templates from Figma/PSD-style mockups with strong attention to usability and visual consistency.
- Integrated frontend interfaces with APIs to display dynamic application data.
- Maintained consistent UI behavior across browsers and devices through testing and debugging.

ADDITIONAL QUALIFICATIONS

- Strong communication and collaboration skills
- Detail-oriented with a focus on clean, maintainable code
- Solid debugging and problem-solving ability
- Continuously learning modern frontend best practices
